Are You Interested

❧ ❧ ❧ ❧ In Plants

As Well as in Birds and Animals?

Then you ought to read THE PLANT WORLD, the only popular journal of its kind in America. The fifth volume, beginning in January 1902, will have a series of articles on the prominent botanical institutions of the country, illustrated with beautiful half-tones from photographs. Possibly, too, you will be interested in the eight-page supplement, which takes up in proper sequence and discusses from month to month all the families of flowering plants, telling their distinguishing characters, economic uses, and where they are found. It is copiously illustrated with drawings and photographs made expressly for us.

THE PLANT WORLD is an original magazine, edited for the botanist and plant lover alike, but technical matter is excluded. Everyone is welcome to tell his or her experiences in its columns.

If you knew you could secure a sample for a 1-cent stamp wouldn't you send for it? And after you had read it and found that it only cost \$1.00 a year wouldn't you feel sorry because you hadn't subscribed earlier?

We should like to tell you about some other publications, but THE PLANT WORLD will do that if you will let it make your acquaintance.
